PROJECT EXPERIENCE

Dentist website for appoint control (REACT)

Developed and implemented a comprehensive web solution for appointment management in a dental practice. Responsibilities included designing and implementing administrative and client roles to enhance efficiency.

Quext Websites (VUE)

Led the front-end development and contributed to the backend integration of a website facilitating the creation and sale of condominiums and hotels. Played a pivotal role in ensuring seamless functionality and an intuitive user experience.

Digital Human IA Integration (VUE)

Oversaw the integration of an AI system for personalized tours and hotel or condominium reservations within the Quext platform. This enhanced user engagement and streamlined the booking process, elevating the overall user experience.

Geeklist Website Beta (REACT)

Geeklist is a social platform for developers to highlight their achievements, share resources and collaborate, your status can be sold as an NFT
