PROFESIONAL EXPERIENCE

FullStack Developer - Fresh Consulting - San Jose, San Pedro, 09/2021 - 02/2024

During my tenure at Fresh Consulting, I successfully contributed to five key projects, including Madera Quext, Digital Human, Starlight Solutions, Bike to Work Day, and Morpho web/app. Within these projects, I played a pivotal role in driving technical and project management excellence, resulting in the successful delivery and implementation of innovative solutions. Notable achievements include:

- Integration of frontend components with server-side logic and APIs, optimizing performance and enhancing user experience.
- Spearheaded the creation and optimization of APIs, resulting in improved efficiency and scalability of backend operations.
- Successfully implemented animations and UI/UX designs, resulting in enhanced visual appeal and user engagement.
- Utilize software development methodologies.
- Lead frontend development and conduct code reviews.
- Actively participated in ERP integrations, streamlining business processes and enhancing operational efficiency.
- Conducted thorough troubleshooting and debugging of frontend and backend issues reported by QA, ensuring smooth functionality of applications.
- Collaborated with cross-functional teams to deliver high-quality software solutions, meeting project deadlines and exceeding client expectations.
- Design and develop reusable UI components.
- Utilize frontend build tools and package managers.

FullStack Developer - BlockMatic - San José, San Jose, 01/2021 - 01/2022

During my tenure at BlockMatic, I focused on the GeekList project, where I played a pivotal role in frontend development and UI/UX design. I actively contributed to the following:

- Integrated frontend components with server-side logic and APIs to create seamless user experiences.
- API creation
- Designed and implemented UI/UX enhancements, resulting in improved usability and user satisfaction
- Utilized established software development methodologies to ensure efficient project execution and delivery.
- Provided expert troubleshooting and debugging support for frontend and backend issues identified during QA testing.

Project Experience

Bike to Work Day

Bike to Work Day is a free, fun annual event focused on encouragingpeople to try out commuting by bike

technologies: React, NodeJS, NestJs, MySQL, Mapbox. Here

Quext Websites

The website facilitates apartment owners and operators in selling or renting their properties. It allows owners to establish their network and utilize widgets to create a website containing information about their condominium, residence, or apartment.

technologies: Vue, PHP 5.x-7.x, *Laravel, AWS*, Jenkins. Here

Digital Human IA Integration

Implemented an AI system for personalized tours and hotel or condominium reservations within the Quext platform. This initiative significantly enhanced user engagement and streamlined the booking process, resulting in an elevated overall user experience.

technologies: Vue, NodeJS, ExpressJS, AWS, Jenkins Here

Geeklist Website Beta

Geeklist is a social platform for developers to highlight their achievements, share resources and collaborate, your status can be soldas an NFT.

technologies: React, NodeJS, NestJS. Here

Starlight Solutions

Starlight offers solutions specific to key business lines in waste andrecycling: roll-off, commercial, residential, portable toilet, facility management and recycling.

technologies: React, NodeJS, Docker, Postgres, QuickBooks.Here
